Anatomy of an FluidX Tube External Thread, Tri-Coded

The Tri-Coded tube with external thread cap offers our most secure seal. This highly secure design also offers significant benefits over internal thread caps including, a higher working volume.

External Threaded Cap:

- Automation friendly
- Our most secure cap
- Enables greater working volume
- Designed to prevent over tightening

High Quality Virgin Polypropylene:

- No detectable leachables or extractables
- Manufactured from USP Class VI resin in a Class 8 clean room
- Endotoxin, DNA/RNA, heavy metals & animal free

Side Coding:

- Linear Barcode
- Human Readable Number
- Permanent laser etching

Clear Window:

- Allows visual inspection
- Optional space to print direct due to high quality manufacturing

2D Coded:

- Enables whole rack or single tube reading
- High contrast enabling reliable reading
- Permanent laser etching
